

Here comes £3,000 to boost your business.

Why not ask Boris to pay for your new Dedicated Business Internet connection?

If you're a small to medium business, you can save up to £3,000 through the Government's Connection Vouchers scheme. So you can get a reliable internet connection with consistent speeds, equal download/upload from 20Mbps to over 100Mbps, and save a packet.

The scheme is delivered in the capital by The Mayor of London.

How you apply

1. Check your eligibility.
Visit www.connectionvouchers.co.uk/london for more details.
2. Call Relish for a quote. The Government will pay up to £3,000 upfront reducing your monthly charge.
3. Send your quote to the GLA for approval.

When your quote is approved, let us know and we'll take it from there. Once you have your superfast connection installed and have received an invoice, simply submit a copy to the GLA and they will pay us directly. And you'll be doing business superfast.
